# STATEMENT OF SCOPE

## PHARMACY EXAMINING BOARD

**Rule No.:** Phar 7.10

**Relating to:** Administration of Drug Products and Devices Other Than Vaccines

**Rule Type:** Both Permanent and Emergency

### **1. Finding/nature of emergency (Emergency Rule only):**

2015 Act 290 creates the ability for a person engaged in the practice of pharmacy to administer by injection a prescribed drug product or device pursuant to requirements and procedures established in the rules promulgated. Act 290 went into effect on March 31, 2016. A final rule submitted to the legislature in the remaining months of 2016 will not be considered received until the first day of the next regular session of the legislature. Due to the timing of the Act's effective date, this creates a delay in the implementation of Act 290.

Rules promulgated to implement Act 290 will create increased patient access and adherence to medications by allowing pharmacists to assist patients in the community with self-injectable medications or in the institutional setting as part of the multidisciplinary care team. Preservation of the public health, safety and welfare necessitates putting the rule into effect prior to 2017.

### **2. Detailed description of the objective of the proposed rule:**

The objective of the proposed rule is to establish requirements and procedures for a pharmacist or pharmacist intern to administer a prescribed drug product or device in order to implement 2015 Act 290.

### **3. Description of the existing policies relevant to the rule, new policies proposed to be included in the rule, and an analysis of policy alternatives:**

Prior to Act 290, a pharmacist or pharmacist intern could only administer an injectable prescribed drug product or device in the course of teaching self-administration techniques to a patient. Act 290 removes the restriction for the purposes of patient teaching only. The proposed rule would update the requirements and procedures to reflect the statutory change.

### **4. Detailed explanation of statutory authority for the rule (including the statutory citation and language):**

s. 15.08(5)(b), Stats. Each examining board: shall promulgate rules for its own guidance and for the guidance of the trade or profession to which it pertains and define and enforce professional conduct and unethical practices not inconsistent with the law relating to the particular trade or profession.

s. 450.02(2g)(b), Stats. The board shall promulgate rules that establish requirements and procedures for the administration of a drug product or device, as defined in s. 450.035(1g), by a pharmacist under s. 450.035(1r).

### **5. Estimate of amount of time that state employees will spend developing the rule and of other resources necessary to develop the rule:**

75 hours  
Rev. 3/6/2012

**6. List with description of all entities that may be affected by the proposed rule:**

Pharmacists, pharmacist interns, and patients.

**7. Summary and preliminary comparison with any existing or proposed federal regulation that is intended to address the activities to be regulated by the proposed rule:**

None

**8. Anticipated economic impact of implementing the rule (note if the rule is likely to have a significant economic impact on small businesses):**

None to minimal. It is not likely to have a significant economic impact on small businesses.

Wisconsin Pharmacy Examining Board  
P.O. Box 8935  
Madison, Wisconsin 53708-8935

Dear Dr. Schumacher,

**RE: Pharmacy Examining Board April 7, 2016 Meeting Agenda Request**

We request time at the April 7, 2016 Pharmacy Examining Board meeting to provide an informational overview of tech-check-tech (TCT) opportunities in community pharmacy settings. Community pharmacy-based TCT programs are being evaluated for the potential to afford pharmacists more time to provide clinical services such as immunization administration and medication therapy management.

In the future, the Pharmacy Society of Wisconsin seeks to conduct and advance research entitled "Advancing Community Pharmacy Quality – A Wisconsin Statewide Research Pilot Project." The intent of the project is to implement tech-check-tech programs in a variety of community pharmacy practice settings across the state and assess the impact of the program on patient safety measures and pharmacist patient care service expansion.

This research pilot project is similar to efforts in Iowa to evaluate a new practice model for community pharmacy designed to facilitate community pharmacists delivery of patient care services. Pharmacy practices intended for inclusion in that project includes independent, chain, and health-system pharmacies.

We believe the outcomes data from this pilot project will assist the Pharmacy Examining Board in future revisions to the Phar 7 Administrative Code related to tech-check-tech in community pharmacy settings. Thank you for your consideration of our request for this informational overview.

Sincerely,

A handwritten signature in cursive script that reads "Anna Legreid Dopp".

Enclosure: Advancing Community Pharmacy Quality – A Wisconsin Statewide Research Pilot Project Description

**Advancing Community Pharmacy Quality**  
**A Wisconsin Statewide Research Pilot Project**  
*Leveraging Tech-Check-Tech to Expand Patient Care Services in Community Pharmacies*

**Background**

Numerous studies have shown pharmacists can improve patients' clinical outcomes from medication therapy, but ongoing research outlines the barriers to pharmacists' ability to provide expanded care services. According to the 2013 MTM Digest, the greatest challenge, following reimbursement, was pharmacists having inadequate time to provide clinical services. Additionally, workflow and time limitations were the most prevalent barrier to WPQC service provision in the 3-year PSW led research project.

For years, the Wisconsin Pharmacy Examining Board (PEB) has recognized the role of hospital pharmacy technicians in assisting with product verification when technology, training, and quality assurance programs can be leveraged – tech-check-tech (TCT). This expanded role for pharmacy technicians has resulted in the ability of pharmacy departments to deploy pharmacists' time for clinical services, enabling them to address clinical outcome improvement for patients.

**Proposed Pilot Project Goals**

Building upon the track record of successful TCT programs in Wisconsin and based upon the findings from a recently completed, 2-year pilot research project in the state of Iowa, PSW would like to propose expansion of Wisconsin TCT programs to community pharmacies and intends to submit a pilot project proposal for PEB review at a future meeting.

This PSW led 2-year research pilot would aim to implement TCT programs in community pharmacies and assess:

- Aim 1: Impact of a TCT program in community pharmacies in Wisconsin on patient safety measures.
- Aim 2: Impact of a TCT program in community pharmacies in Wisconsin in facilitating community pharmacist-provided patient care (expanded immunization services, coordination with other health care providers, collaborative practice agreement implementation, medication therapy management including comprehensive medication reviews, medication adherence counseling, etc.)

**Key Pilot Components**

- Creation of policies, procedures, and training materials to ensure the program's adherence to legislative statute, regulatory allowances, and best practice standards
- Identification of 15-20 pilot sites having capabilities to expand clinical services
- In cooperation with a university research partner and with IRB approval, collection and analysis of data assessing achievement of program's aims with regular reporting to PEB
- Compile and report data to inform future PEB rule-making

**Funding**

This project is supported, in part, by a grant from the National Association of Chain Drug Stores (NACDS).
